

# ¿CÓMO ARMAR EL MOLDE EN CASA?

1. Imprimir todas las páginas de este archivo en papel A4 a tamaño real.

2. Unir las hojas teniendo en cuenta lo siguiente:

Hay que hacer corresponder verticalmente: A1 con A1, A2 con A2, etc. y horizontalmente: AB1 con AB1, AB2 con AB2 y así. A y B son las únicas que forman una sola pieza entre las dos, C, D y E son individuales.

3. Luego recortar los moldes por el contorno.

**A y B:** Manga. **A** va unida con **B**.

**C:** Delantero

**D:** Trasero

**E:** Capucha

**Siempre la más económica**
